

CONSORTIUM OF NATIONAL NETWORKS – *Networking2Save*

Partnerships for Tobacco Control Programs working with Special Populations to Advance Health Equity

CDC supports a consortium of 8 national organizations to advance the prevention of commercial tobacco use and cancer in populations experiencing tobacco- and cancer-related health disparities.

The Networking2Save approach intends to encourage organizations to work together to prevent and control tobacco-related cancers in special populations through partnerships with public health programs, data and information systems, practice and service, and resources.
